UHS Clinical Quality Reputation, Accomplishments and Awards:

We have a longstanding, independently validated and evidence-based record of providing quality healthcare services to patients and their families:

- All UHS hospitals are fully accredited by independent organizations including The Joint Commission (TJC) and/or Commission on Accreditation of Rehabilitation Facilities (CARF), whose rigorous clinical assessment protocols are widely respected throughout the healthcare industry. Many facilities also hold advanced specialty accreditations.

Behavioral Health Division

- UHS BH facilities continue to routinely exceed the national average in TJC's Hospital-Based Inpatient Psychiatric Services (HBIPS) scores while also receiving other laudable distinctions. For example, in 2019, Hartgrove Hospital was the first hospital in the nation to be awarded a rigorous Disease-Specific Certification for Trauma-Informed Care from TJC.
- All UHS BH hospitals participate in CMS' Inpatient Psychiatric Facility Quality Reporting Program (IPFQR) used by over 1,500 BH hospitals across the U.S. to measure a broad set of evidence-based clinical practices linked to positive patient outcomes and are published on CMS' Hospital Compare web site. **UHS BH hospitals' aggregated results regularly exceed national averages and the scores of its major BH multi-facility competitors.**
- In 2021, approximately 360,000 UHS BH patients completed anonymous patient satisfaction surveys. On a five-point scale (1 being low and 5 being high), **UHS patients rated their overall satisfaction during this period at 4.4, with 91% indicating that they felt better after care¹.**
- In 2021, 170 UHS Behavioral Health facilities with 888 distinct treatment programs captured evidence-based clinical outcomes measures for nearly 310,000 patients. UHS continues to dramatically expand use of these tools to benchmark performance and enhance our patients' quality of life. **We are pleased that UHS can demonstrate that of patients measured, approximately 77% exhibited statistically meaningful improvement using patient self-report rating scales¹.**
- We measure loyalty using the question, "How likely would you be to recommend this facility to a friend or family member?" In 2021, the UHS Behavioral Health Division's Net Promoter Score was 37.1, which represents the **percent** of promoters minus the **percent** of detractors. This score is considered very good by industry standards.
